

1200DF

Make-Up Air Heater

Totally Enclosed Flame

Now It's Easy To Be GREEN!

MAXIMUM PERFORMANCE with UNEQUALED RELIABILITY

- Certified for maximum 175°F temperature rise and 210°F discharge temperature.
- Burner mounted downstream of blower so motor and other critical components are located in cool air stream for extended service life.
- Modulating burner system provide precise temperature control (6 to 1 ratio). 5 year warranty on burner.
- Integral VFD provides variable air volume control and minimizes motor inrush current allowing the heater to be safely powered by a generator set.
- Optional diffuser provides easy attachment of multiple flexible ducts for quick and convenient distribution of discharge air in the building. High static blower allows ducting up to 300'.
- Non-recirculating design uses 100% fresh outside air so pollutants from construction process and indoor moisture levels are reduced. Heater is certified to the most stringent Canadian requirement of 0.02% CO (Air-Free) "You Can Smell The Difference".
- Meets basic requirements for LEED EQ Credit 3.1, 3.2.

SPECIFICATIONS

Input	1,200,000 BTU/Hr
Fuel	Vapor Propane/Natural Gas
Min/Max Inlet	1/10 PSI
Gas Connection	1" FNPT
Electrical	230 Volts, 1 Phase, 27.6 Amp
Fan	6000 CFM Max.
Thermostat	Setpoint Control
Temp Rise	175°F
Duct	12", 3 Outlets
Shipping Dim.	110" x 45" x 58"
Weight	1,000 lbs.
