

MAXX-ERGO-LIFTER

The MAXX-ERGO-LIFTER is a highly maneuverable light capacity lifter designed for multiple material handling applications. It is equipped with a standard platform and has a load capacity of 330 lbs. Ideal for assembly operations, ergonomic applications and other material handling needs. The MAXX-ERGO-LIFTER features a lift/lower button on a flexible control cord that allows the operator to be in the most comfortable position while lifting or lowering loads. The electric lift is battery operated and features an on board charger that runs on 110 volt input. Also available are five optional attachments that customize the unit for specific applications including roll and coil handling attachments and a tote lifter attachment that are bolted on permitting the unit to be changed back to the standard platform when required.

Model	MXE-150
Capacity	330 lbs at 9" load center
Maximum platform height	59"
Lowered height	5"
Straddle ID	18.75"
Straddle OD	23.25"
Platform size	18.5" x 23.5"
Overall size	35" x 23.5" x 70"
Steer wheels	5" swivel with brake
Load wheels	3" swivel
Battery	24 volt maintenance free
Charger	auto on board

Attachment A-1 is used for rolls or coils that require lifting from underneath. Ideal for placing rolls on and off a shaft.

Attachment A-2 is a single ram suited for lifting coils or rolls through the core. The ram length is 24" long and 2" in diameter.

Attachment A-3 is a dual ram arrangement. The ram length is 17.75" long and 2" in diameter. The distance between the rams is 6". It can be used to cradle rolls or can handle two small rolls at one time through the core.

Attachment A-4 is a roll handled designed to handle rolls in the vertical and horizontal position (poker chip position). The unit features an expandable ram that holds the roll by expanding in the core and turning the wheel pictured. The ram is 11" long and is 2.9" in diameter.
